

EvacGo Evacuation Alert System

The easy way to ensure you've got the
BS 8629 Code of Practice covered

EvacGo is designed for total flexibility in supporting the fire and rescue service's chosen evacuation strategy.

- Dedicated fire and rescue service evacuation control system complying with all appearance, functionality and operational requirements of BS 8629
 - Available in 8, 16, 24 and 32 fire fighter evacuation alert area options
 - Robust, tamper-proof cabinet meeting STS 205 class BR2 security rating with patented BS EN 1303-compliant lock for full BS 8629 compliance
 - Quick to install
 - Simple and easy to use
 - Clearly marked 'EACIE: For Fire and Rescue Service Use Only'
- The layout of controls reflects evacuation alert zones in the building for ease of use and a quick, confident response
- Clear LED indication for rapid status identification
- Slide-in labels and modular switches/LEDs for clear, easy customisation per site
- Approved EN54 components for quality, reliability and peace of mind
- Can easily accommodate wired, wireless or hybrid system configurations
- Latest in microprocessor technology and digital communications for fast operation
- Dedicated access control for service and maintenance using advanced CIE technology
- Specially-designed software supports event reporting, service scheduling and customised reports
- Virtual display thanks to the latest Windows-based PC configuration software, for easy testing and commissioning
